About This Game

Hobbit Village was once a peaceful place, but tragedy struck when a hobbit named Sam found a magical artifact. Unintentionally plunging the village into a terrible war, Sam became hated and despised by his friends and neighbors.

Now the war is over, but the village still blames Sam. Determined to help the suffering hobbits, he partners with a witch named Alice to restore the village and drive away the darkness around it.

Help Sam and Alice collect the materials they need from each of the five nearby islands! Match elements, use tools, and use your puzzle-solving skills to drive back the enemies of Hobbit Village and restore it to its former glory.

Game Features:

- An exciting story about a witch, a hobbit, and their friends as they fight to save the village
 - 74 challenging match-3 levels
- 20 village upgrades to build with materials gathered from 5 islands
 - A charming cast of characters facing a dangerous enemy
 - A beautiful soundtrack to set the stage for Alice's quest

I would play more of this game today however, I am ill so I cannot. Anyway from the time I have played so far here is my experience with Quick Draw.

It is something different, there are a lot of games for the VIVE where you just stand and shoot.. boring right? Quick Draw is well, that but it adds something new to it with the wild west setting and the fact you have to draw your weapon at the same time.

I was immersed into this game, even putting on a fake accent and physically pretending to be in a movie or something (I'm a streamer, not a crazy person). Anyway it was a lot of fun to play and something I have never tried before.

The game is not perfect though, after a while it can get repetitive, this is because of the lack of gamemodes in the game, at the moment there are only 2 gamemodes. A shooting range time trial and the 1v1 quick draw, there will soon be an online feature which I am very excited for but at the moment the game is very limited. I would say for the price it is OK but not perfect, I would love to see more features in the game at a later date, maybe even some missions like a Saloon gunfight or something (I understand that will counter the name of the game being Quick Draw but it would still be fun, especially with the cartoony graphics which I have happened to fall in love with.) Anyway, if you have some money to spend and want to try something new give this a shot!

RATE: 6/10 (for now)

NOTE: Will update this review when the game leaves Early Access.. It feels like LuGus Studios start running out of money. As if everyone that would want Liftoff already has bought it and now are they not selling so many new copies. To solve it they release a DLC. Although it is not a big DLC it is also not an expensive one, so the developers are not greedy, which is great.

The night maps look good. It is very nice with additional details like fog, lit windows, campfire, candles and more. (However you can land the drone in the campfire without taking damage and you can't blow out the candles by flying over them). It feels like the Night Fever maps generally looks better than their respective daylight map.

One thing I was hoping for in this DLC was the cyberpunk drawing board. While it looks good it sadly has two big flaws. One is that the reflection on the floor only reflects the sun. If you e.g. are standing inside a box you can't see the sun directly but you can see the sun through the reflection on the floor. The second drawback is the complete lack of shadows. Sure for that it fits the cyberpunk theme but it also makes it much harder to understand the 3D structure of the map.

The DLC also contains many drone skins. Some look really good and other has additional functionality with flashlights. One natural drawback with FPV is that you don't see your own skin while flying. On the other hand the game does a good job with showcase your drone in a lot of other situations (e.g. loading screen).. This is another great episode. It looks good, It's a new big open location for you to explore, which is great.

But how does this one stand out from the others?

**Well, all episodes have been really good so far (It just keeps getting better and better each episode imo)
But what differs this one from the others is the new voices everywhere. You'd be amazed just how much of a difference sound can do. It's been a new location each episode but this one feels the most different, and I like it a lot.**

I hope they keep this up and not use the same voices for every episode.

Nicely done IO, you did really well on this one.. Feels very unfinished, as if they just slapped the 3D element onto match-4 and then released it changing nothing else.. While this game is fun to play, you do need to complete hidden picture tasks to receive money to upgrade or work on the farm. The story line is good, the voices and graphics are well

done and the overall story is much like Stardew. Great game for those looking to farm, as well as enjoy some brain games. Crashed a few times, but besides that, a fun game to play.. Interesting strategic game, enough content for the price.

Agreeable for short playing sessions, with different difficulties suitable for harsher games.. This is much better than the second episode, and the detective system actually works. It's still a bit annoying that the ending is determined by a completely arbitrary choice, but it doesn't affect the rest of the game so I don't mind too much.

The story, characters and setting are very compelling. This was also true for the other games but here these aspects are given more attention, and the detective system doesn't ruin everything else like in Kansei. I also really like the artwork. So if you were put off by the second game, do consider playing this one, as it has the best of the first two games: a detective system that makes sense, and more attention given to the advancement of the overall story and character development.. Its a nice puzzle game for its price, more then one room, thank god, but I hate to be this guy, my rooms super small, and I hate geting refunds on good games, Just add a teleport function please. Solid game with full featured CRPG mechanics. Goes highly recommended.. Very Unique and fun to play, and for 99cents it's a steal!

First of all, If you don't like reading games, then skip this one. If you like these kind of games, then good luck with finding out what the game want to tell you! English isn't my first language, and that makes it a lot harder to understand the text. The grammatical errors are largely present, an dslow the pace of the game very much down.

Besides this, there is no tutorial, so you have to find out what the game want from you. The cases you get are interesting, bust its very short based. I'd like to see more "hearing" of the persons you have in front of you, not just reading one sentence.

Hopefully it will be further developed, because it has a lot of potential, but on this moment I won't recommend it.. Remember Defender? The coin op game from the early 80's? Ever wish you could play defender while not worrying about trying to save ♥♥♥♥♥♥♥♥s and just shoot stuff? This is that game.. I love this game. I will 100% this soon!. The feeling of painting is close to spot on, it's very imersive and precise. Only spraypainted acrylics, a case and rims in real life, but the feel is there. Paint reacts in ways to expect it to.

Haven't notice any of the performance dips or desyncs others been complaining about.

The medium spray can could be improve at low trigger pressure and the "lowest pressure can" needs to be a bit stronger overall. Squatting to get lower, but would be nice to step on something to get a bit higher. Lefthanded option is also rather important.

The game is good overall; I can paint, save and load without a hazel. The only real annoyance was the delay/silence of the release itself.. Super buggy, keeps disconnecting.. What can I say about Battle of Words? The possiblities are endless with the mass amount of words to choose from. From basic words to advance words, the player would enjoy the experience of training their mind in a fun and creative way.

This game reminds me of the time when I would spend my free periods with my friends at school challenging one another in a game of words. There are endless outcomes that could come out of our imaginations as we were given a letter selected from a pile.

As I was begin to indulge myself in the past, I saw how amazing this game was. It is both entertaining and educational. Highly addicting and would recommend for ALL AGES.. Excellent short time waster, even if you don't have someone to co-op with (you can play against a Bot. The game itself can be completed with 3 stars on every stage within a little over an hour. If you like to 100% the achievements, you'll grind endless mode for another few hours to get the cash to buy all the choppers. Definitely worth \$1, even better if you can get it on sale.
